

## How this GeoTrail works:

The Main Line Canal GeoTrail (MLCG) is a chance to experience the Pittsburgh to Harrisburg Main Line Canal Greenway through geocaching. The Greenway is a linked network of land and water trails, tracing the path of the historic Pennsylvania Main Line Canal. Caches may be found in an outdoor recreation destination, a key heritage location or an environmental educational site- all ways the Greenway is making new connections between old neighbors.

Find the cache locations by searching "MLCG" on [geocaching.com](http://geocaching.com). At each location there will be a code to fill out this Logbook. You will have to find at least 4 caches in each of the six MLC Greenway regional clusters to complete the Logbook and receive the commemorative MLCG trackable geocoin. For more information and where to turn in your Logbook visit [www.mainlinecanalgreenway.org](http://www.mainlinecanalgreenway.org)

Geocaching families may keep multiple Logbooks but only one geocoin will be allowed per mailing address. Please send us your name, address, phone # and email address and we will return your Logbook with the geocoin.
